DETAILED ACTION

Information Disclosure Statement

The information disclosure statement (IDS) submitted on 4/8/05 was previously and considered but not completely initialed. Accordingly, the information disclosure statement has been initialed as considered by the examiner and another copy provided.

Election/Restrictions

Claims 17-46 stand withdrawn from further consideration based on the 3/24/05 reply.

Response to Amendment

Applicant's arguments, see the amendment and remarks, filed 3/14/05 (now entered with the RCE filing), with respect to the rejection(s) of claim(s) 14-16 under 35 USC 102(e) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Krig et al, US-5,978,707.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3762

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 14-16 are rejected under 35 U.S.C. 102(e) as being anticipated by Krig et al., US-5978,707. See column 5, line 42 to column 5, line 20. VT-1 and VT are available clinical rhythms for selection, each having detection enhancements, i.e. the lower rate which is programmable within a given range, the range being dependent upon the selected clinical rhythm and adding specificity for determining when to deliver shock therapy for the selected rhythm.

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.
